PROLICHT luminaires now available in pCon.planner

PROLICHT continues to expand its service offering for architects, lighting designers and interior designers: A selection of PROLICHT products is now available in **pCon.planner** — one of the leading tools for **professional 3D space planning, configuration and client presentations**. The product portfolio is continuously being expanded.

Smart planning for demanding projects
With this new pCon integration, PROLICHT luminaires can be seamlessly incorporated into digital planning workflows:

- **3D planning & visualization:** PROLICHT products are provided as high-quality 3D objects in pCon.planner, enabling realistic visualizations and precise integration into architectural designs.
- **Professional client presentations:** High-end renderings and animated visualizations help communicate lighting concepts effectively — both within project teams and to clients and investors.

Benefits for planners and architects
The pCon.planner integration offers several advantages:

- Efficient planning and simulation of lighting concepts
- Increased planning accuracy with verified 3D product data
- Fast and impactful visual presentations for clients and project teams

A key element of PROLICHT's digital strategy
By integrating with pCon.planner, PROLICHT is reinforcing its strong commitment to **digital lighting design solutions**. Together with existing support for **Relux and DIALux**Presskit - Innovation -…, this creates a powerful digital ecosystem for planners across the **office, retail, hospitality, healthcare, and education** sectors.
In addition, PROLICHT offers a wide range of **additional 3D download formats** to support flexible integration into various planning tools.
