

# MINIMAL TRACK

Playful Minimalism

MINIMAL TRACK CATALOGUE 2022  
ENGLISH

All technical information and values (e.g. lumen, output, beam angle or dimensions) correspond to the printing date or the creation date of this document and will not necessarily be updated!  
All changes and adaptations that serve to improve our products can be carried out without prior notice!

The latest data sheets can be configured at [www.prolicht.at](http://www.prolicht.at)!

## VERSATILE AND ALMOST INVISIBLE

The innovative MINIMAL TRACK lighting system combines pure minimalism with the latest technology. Its ultra-compact design makes the sophisticated technology almost invisible, leaving only elegant lines that integrate perfectly into the interior design.

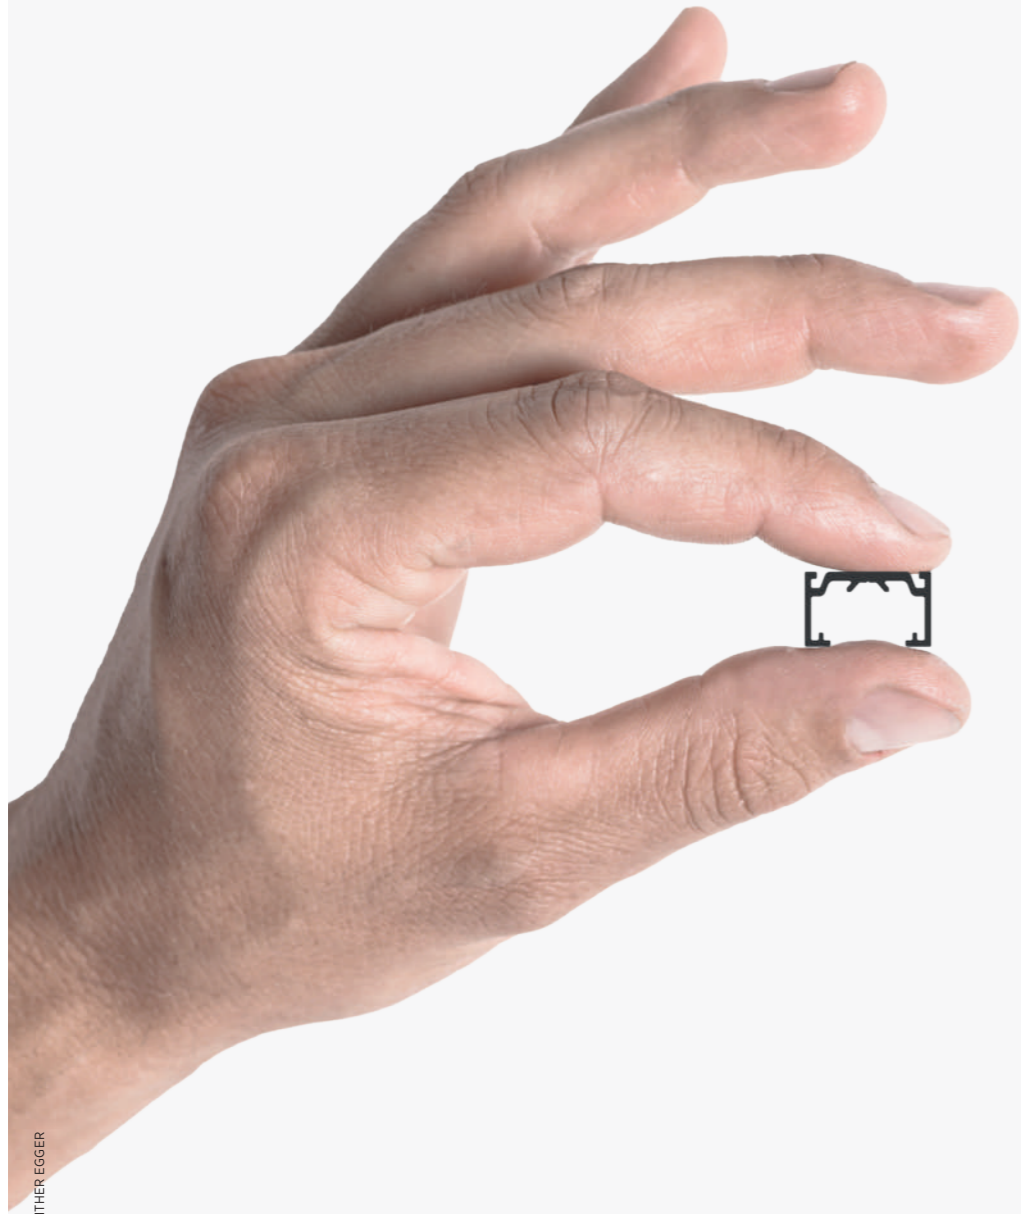

PHOTO | GÜNTHER EGGER

## VISUALLY TRIMLESS

The MINIMAL TRACK with a height of only 9,5mm can be discreetly inserted into the architecture and at the same time convinces with all the advantages of a surface-mounted installation.

# MINIMAL TRACK

## MINIMAL ESSENCE

Minimalistic design, minimal installation effort, tailor-made result in the most simple way.

The MINIMAL TRACK allows you to simply design any line you want – available with 90° integrated connectors for elbows on the same surface or to jump ceiling to wall or T- and X-connectors with two different aesthetics to match various tastes in interior design. The track can be easily cut on site to perfectly fulfil any project requirements.

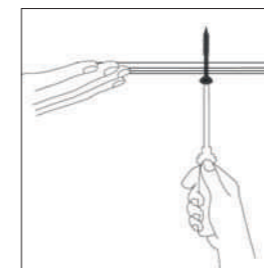

## COLOR MAKES A DIFFERENCE

Unique colors and finishes, with infinite combinations, enable a holistic interior design concept to be completed or certain highlights to be created with our 25 PROLICHT colors. RAL Classic or any other special color is available on request.

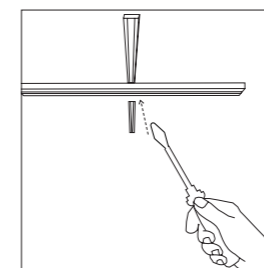

## EASY INTEGRATION

### TRACK MOUNTING

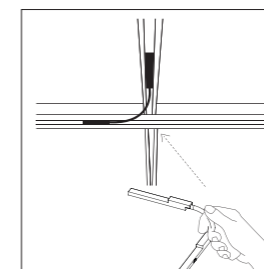

**TRACK MOUNTING** The track is conceived to be easily cut on site, and directly screwed to the ceiling for a tailor-made result in each installation.  
Article-Number for a set of 50 pieces of mounting screws: 800-1427

### CROSSINGS

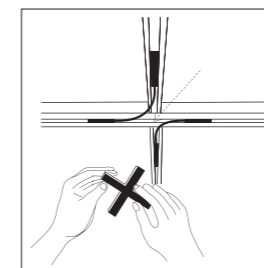

**CROSSINGS** Complex connection pieces belong to the past with MINIMAL TRACK. The linear elements can be used to create crossings in the easiest way. Even after the installation, adaptations can be made with minimal effort.

### ELECTRICAL CONNECTION

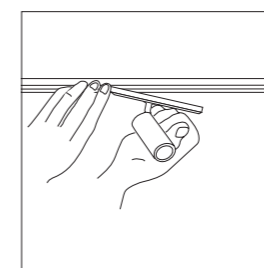

**ELECTRICAL CONNECTION** Every T-Connector is enclosed with one, every X connector with two flexible cross adapters. An electrical connection of the pieces can be established with these components with ease.

### COVERING THE CROSSINGS

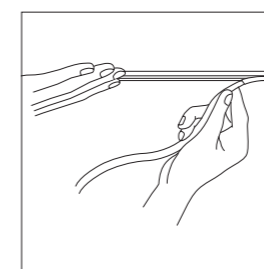

**COVERING THE CROSSINGS** Whether as a colorful accent in the PROLICHT colors or synchronized with the color of the track, the covers are placed as a final step.

### INSERTS

**INSERTS** Place and remove any insert wherever you want by simply pulling it out and snapping it in without any tools needed.

### TRACKMASK

**TRACKMASK** A black flexible rubber cover, easy to cut directly on site after positioning the inserts and integrated inside the track, is the final touch to furtherly minimize the appearance of the MINIMAL TRACK.

**D** QUICK CONNECTOR  
To guarantee a quick and easy installation, we offer additional track components. This black connector is especially suited to facilitate the installation of the MINIMAL TRACK.

**B** MITER JOINT  
The track is designed to be easily cut on site and for a seamless installation of corner elements it is possible to cut the extremities of straight elements at an angle of 45° for a miter-joint connection. If other angles are needed - for a sloping roof for example - the joint can be individualized with a flexible connector.

**D** QUICK CONNECTOR WALL TO CEILING

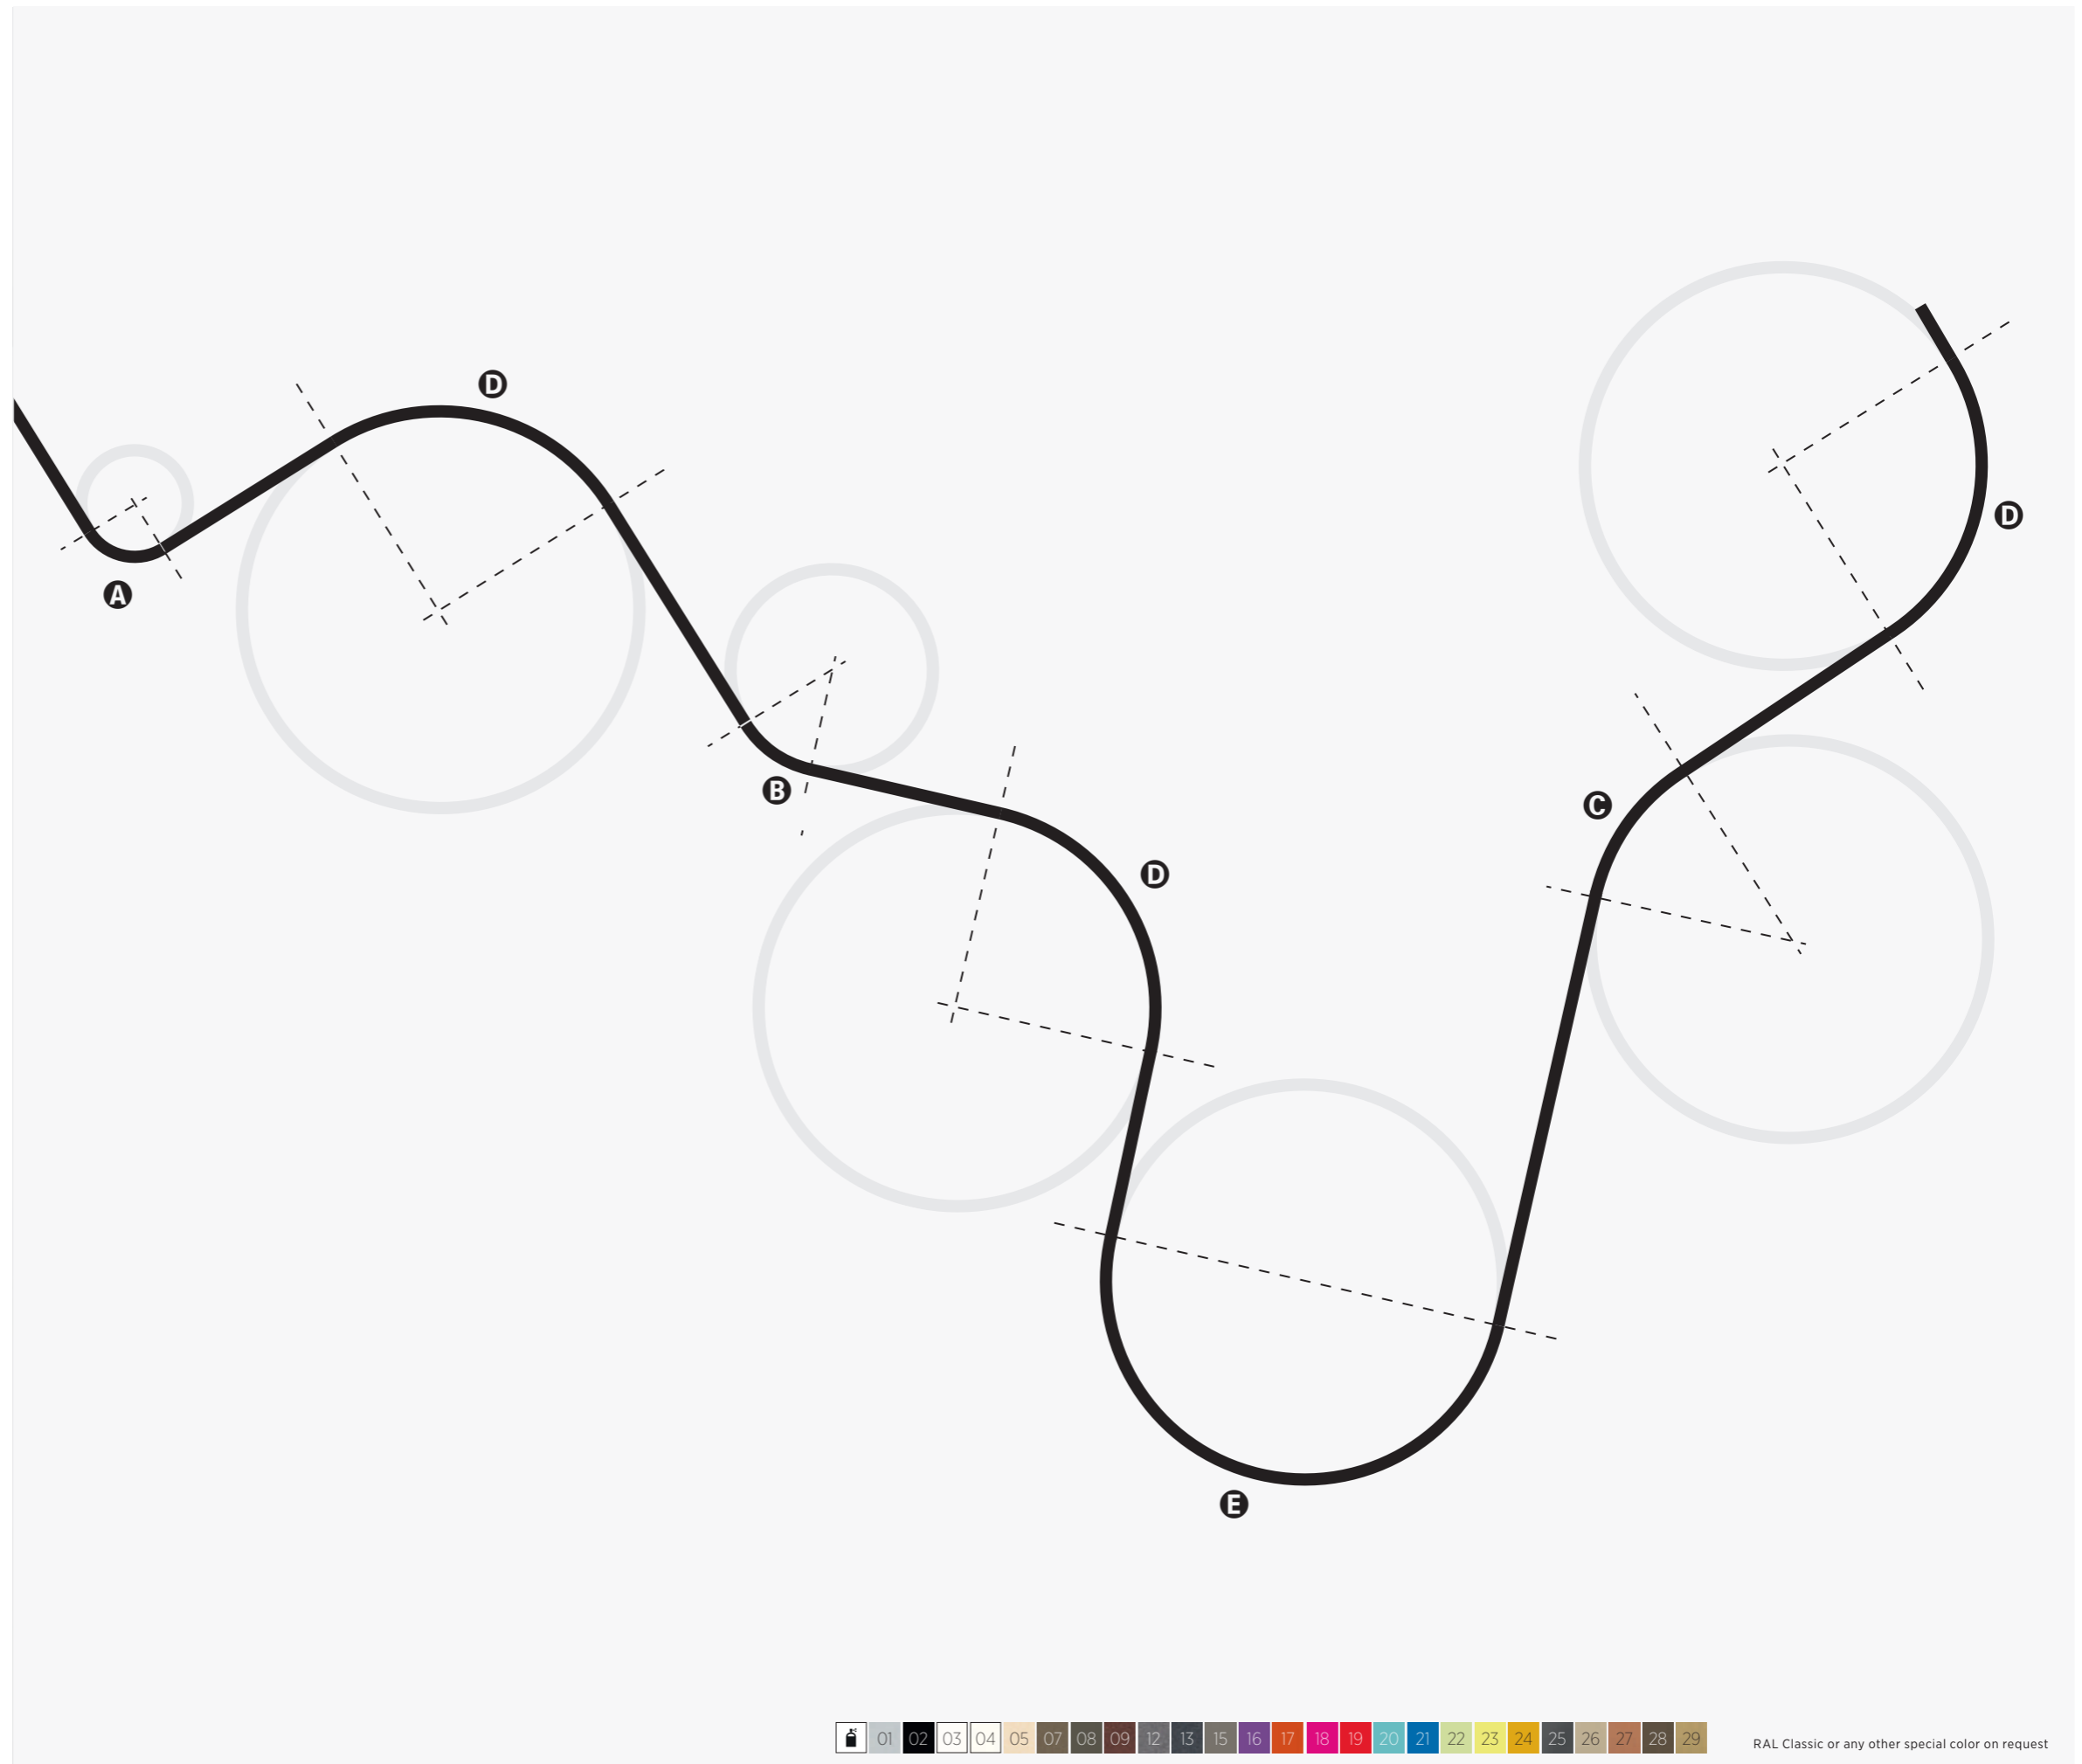

**B** MITER JOINT WALL TO CEILING

## YOUR PERFECT CURVE!

The MINIMAL TRACK offers many solutions to compose curved profiles, with 45, 90° and 180° curved connectors. Individualized solutions can be evaluated on request.

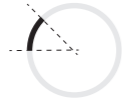

All of the curved elements are available in the 25 PROLICHT colors.

MAGIQ MICRO

The MAGIQ MICRO is part of the MAGIQ family and works with DALI, CASAMBI or PUSH DIM. The inserts can be lined up to fill the whole track with the MAGIQ inserts while the distance of the single dots stays always the same. This leads to a coherent appearance of the system and uniform illumination.

MICROLINE

**MICROLINE**

The specially developed LED Lines can be controlled individually with DALI, CASAMBI and PUSH DIM. The MICROLINE is an essential part of the range of inserts for the MINIMAL TRACK and offers shadowfree LED lines to be integrated into the architecture. Within the track, the lines are seamlessly installed and keep the appearance of the track as minimalistic as intended.

DISQ ROUND COLOR, COLOR 02 BLACK VELVET | DISQ SQUARE, STAINLESS STEEL

DISQ ROUND and DISQ SQUARE are new inserts for the MINIMAL TRACK, offering refined complements to the family. With its discrete 2700K indirect emission and its DALI DIM functionality, DISQ offers maximum lighting comfort.

The inserts are available in two different versions: with a metal plate, which is available in copper, chrome or a stainless steel finish, and a color version, that can be individualized in our 25 PROLICHT colors.

**SNOOKER** The iconic spherical luminaire SNOOKER is a real eye-catcher on its own or grouped in multiples as a light installation. Configurable in the PROLICHT colors, with an additional KORONA SHINE RING and with adjustable cable lengths, SNOOKER offers plenty of design freedom. The unique MICRO DOT lens provides pure light with optimum glare control.

The integrated lens optics allow beam angles of 32° and 58° while offering a maximum effect with a minimal light emission opening.

The HANGOVER PLUG suspended spot together with the PLUG EXSTENSIONS allows a manual adjustment of the wire suspension: the spotlights are available with a rope length of 2 or 4 metres and can be manually shortened or lengthened by rolling into the canopy.

An ingenious docking system guarantees quick replacement and quick locking of the various HANGOVER PLUG modules: this way, the lights can be exchanged at will, giving room for a new look over and over again. The docking system is also available for other product families and guarantees that other luminaires can also be easily mounted (SNOOKER | MELT and OPAL by Tom Dixon)

MELT MINI is a beautifully distorted small pendant in a modern metal finish. Featuring an intergrated LED module, this luminaire creates a mesmerizing melting hot-blown glass effect when on and a mirror-finish effect when off. The luminaire is produced, using a sophisticated manufacturing technique to achieve the perfect melted orb.

With the optional cable loop components and the various cable roller sizes, an adaptation in length is possible at any time in the simplest way. Individualization in the 25 PROLICHT colors is possible so that the components fit perfectly into the existing room concept.

PHOTO | ARMIN KUPRIAN

With the plug connector, SNOOKER and HANGOVER PLUG luminaires can be easily exchanged at any time.

Various cable loops can be used to create patterns that can be placed anywhere in the room and expanded across ceilings and walls. By offering this creative freedom to the designer, cables of pendant lights can be turned into additional design elements. The MINIMAL TRACK system offers you unprecedented freedom to fulfill your wishes/requirements from a functional and a creative perspective.

The main goal of this system is to bring illumination to the places where it is needed - this means that the MINIMAL TRACK liberates the designer from thinking about where the power outlet is and enables a highly individualistic design vision.

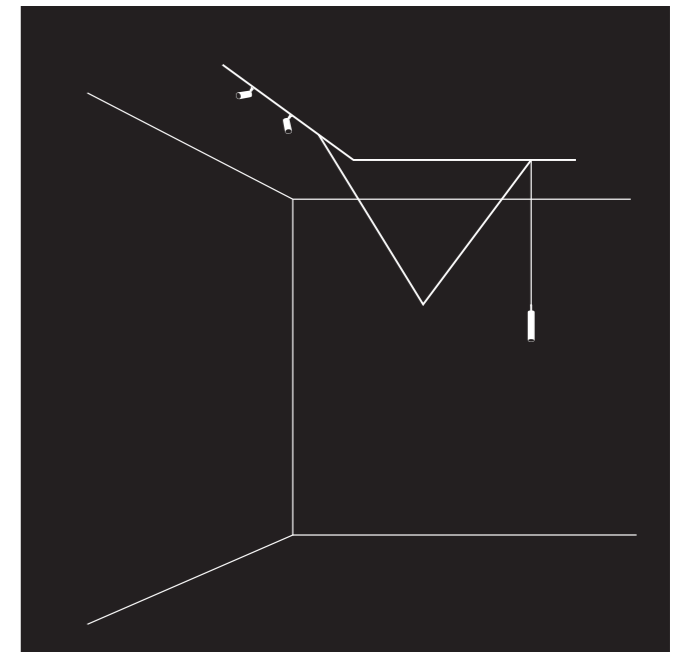

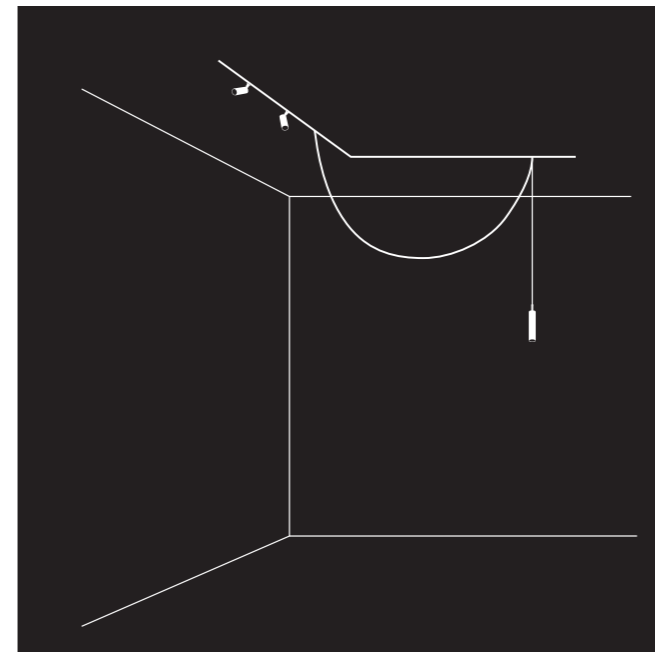

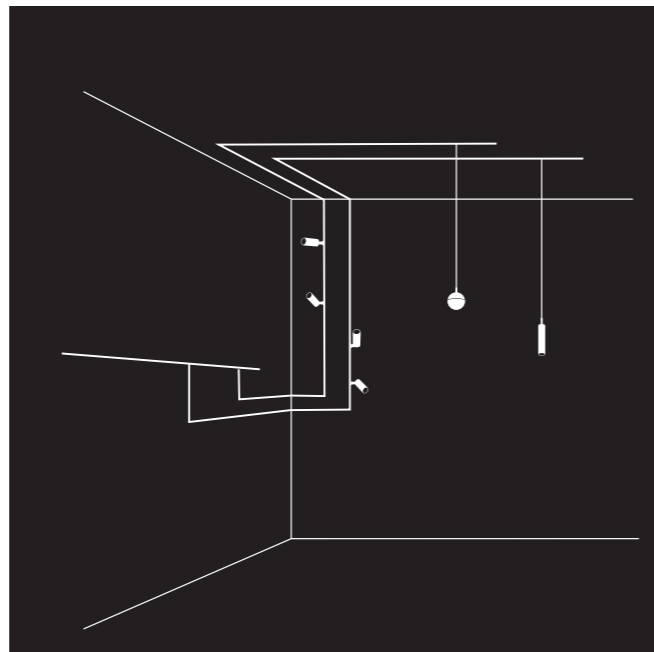

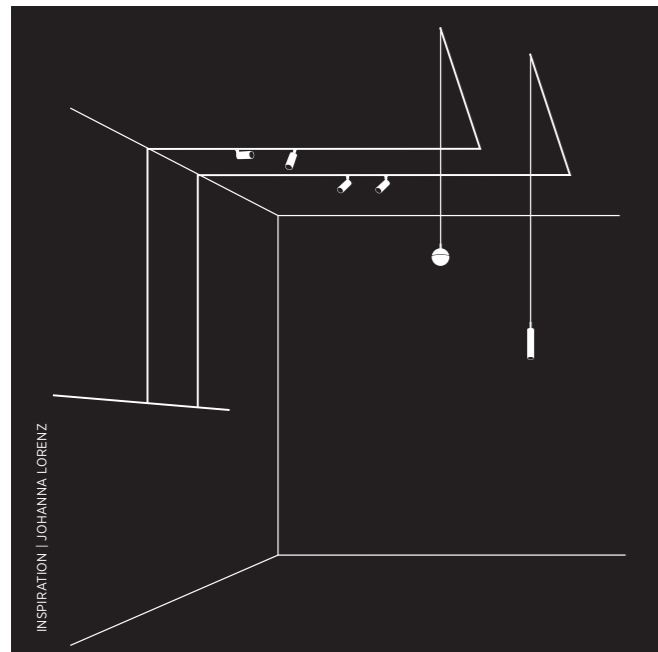

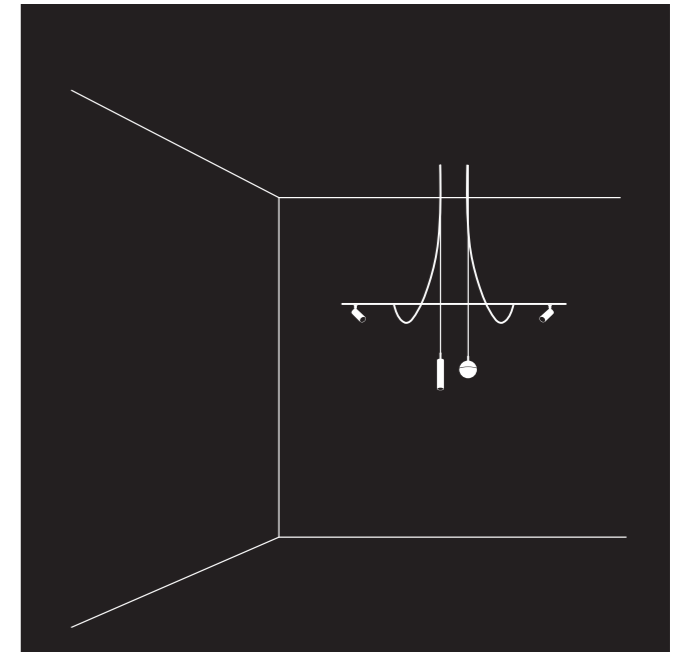

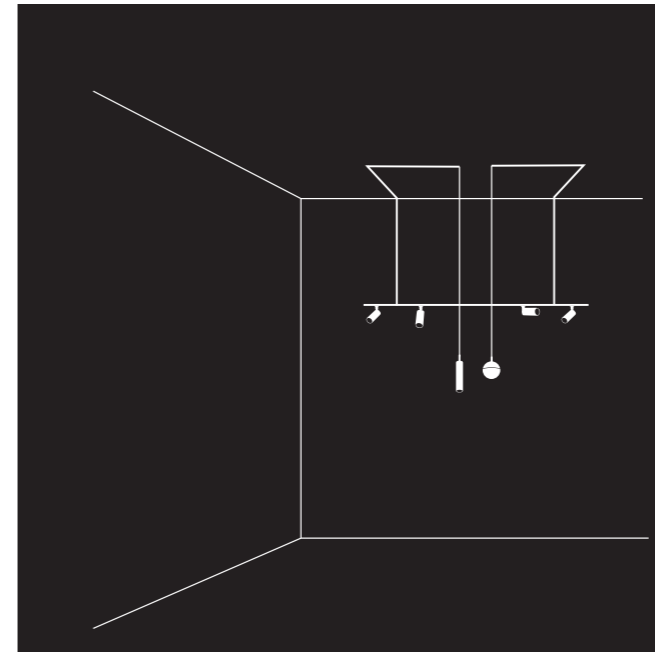

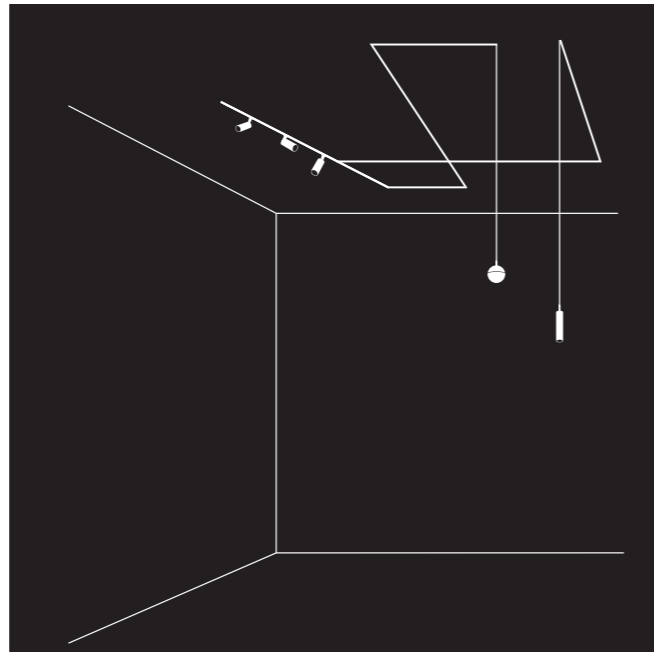

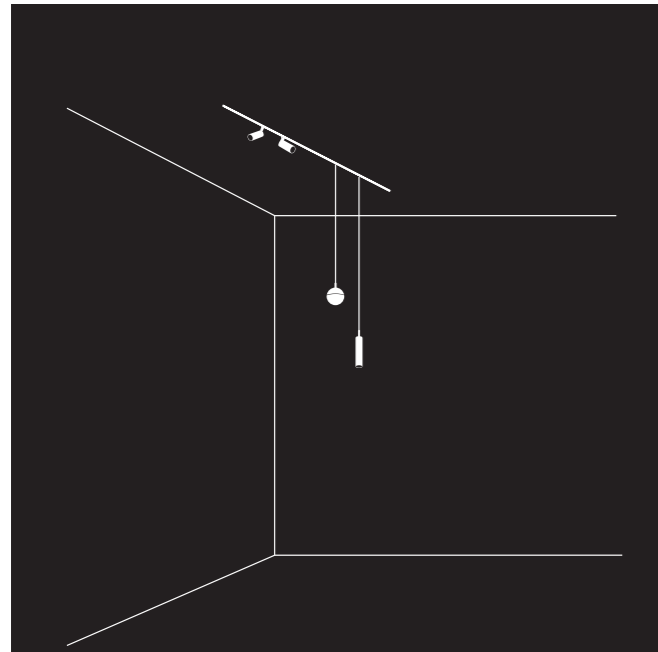

SNOOKER, COLOR 02 BLACK VELVET | OPAL SMALL | HANGOVER, COLOR 25 GUN METAL

MELT MINI CHROME

Minimalistic design, minimal installation effort, tailor-made result in the most simple way - that's the MINIMAL TRACK system. Now it can be equipped with our well-known SNOOKER and HANGOVER inserts to give you even more possibilities to enrich your design concept.

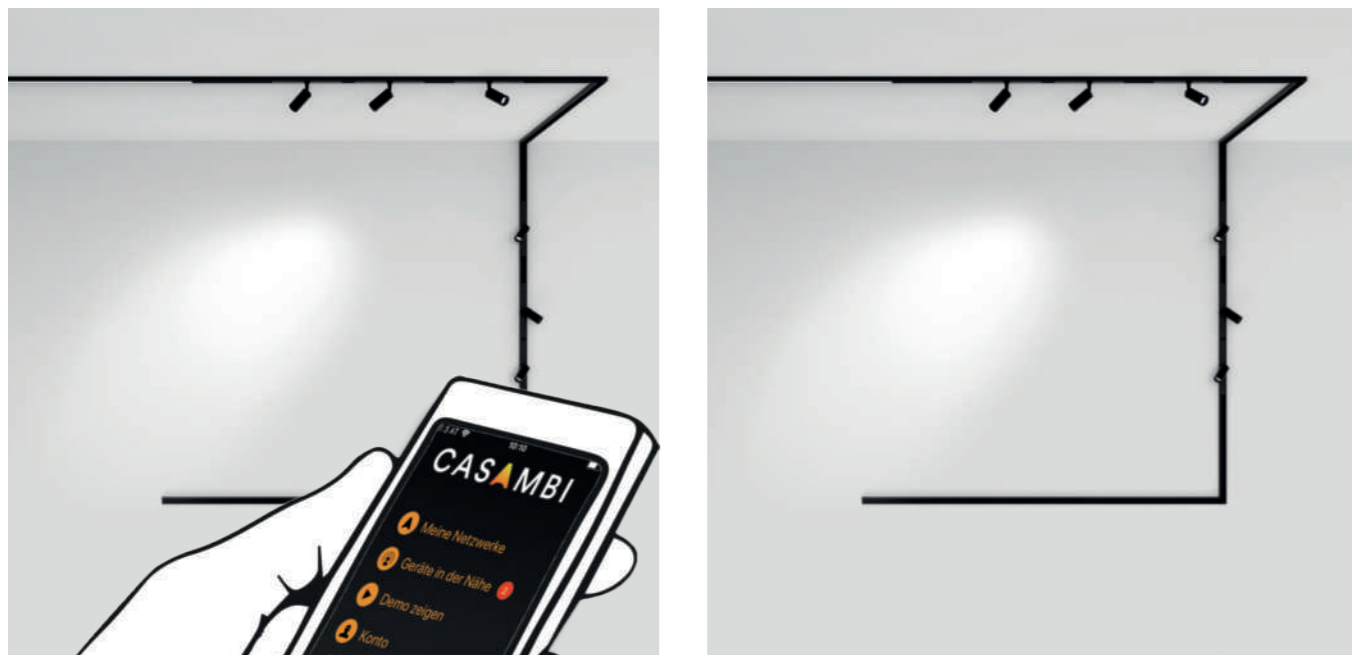

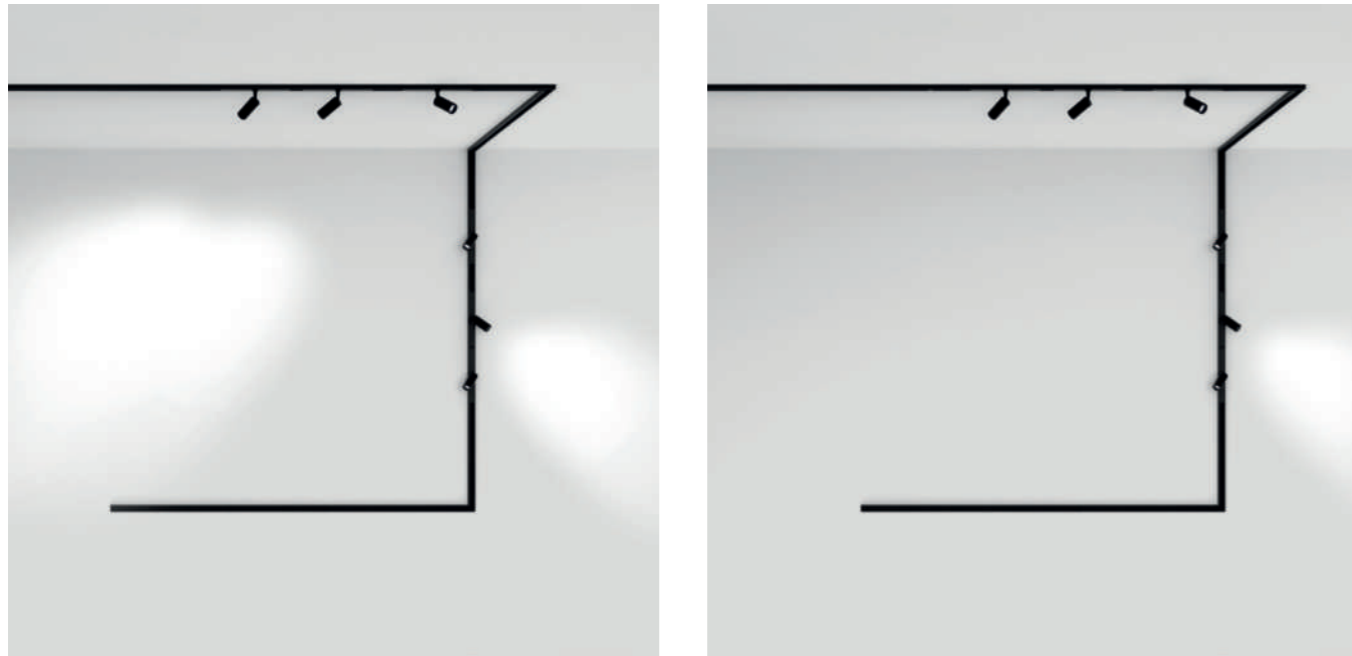

INSPIRATION | JOHANNA LORENZ

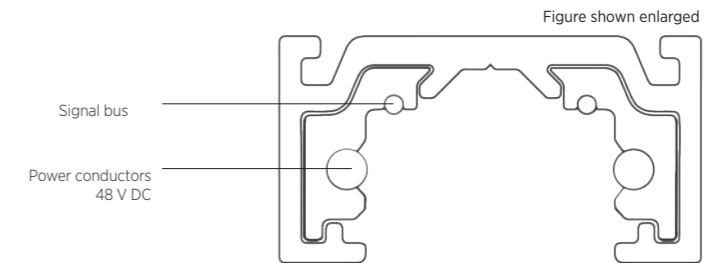

# EXACTLY THE LIGHT YOU WANT

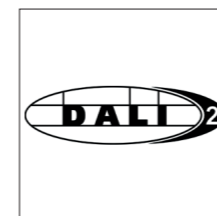

Every moment, every day and every situation is different. Up to 64 inserts for the MINIMAL TRACK can be dimmed individually, in groups or together with DALI and CASAMBI. This enables complete control of your lighting atmosphere.

Despite its exceptionally compact size, the MINIMAL TRACK is designed as a DALI track that can be integrated into any lighting control system. It has two conductors dedicated to DALI in order to enable completely individual control of each installed luminaire.

**64 ADDRESSES**  
DALI offers individual control of each single luminaire, with the possibility of managing groups and scenarios.

**8 ADDRESSES**  
The CASAMBI control allows wireless regulation of up to eight groups of fittings, through physical commands or a mobile App.

**1 ADDRESS**  
The PUSH DIM solution offers simple control of all the fittings in the same line that can be easily dimmed with a standard pushbutton.

**1 ADDRESS**  
Simply ON / OFF without any control

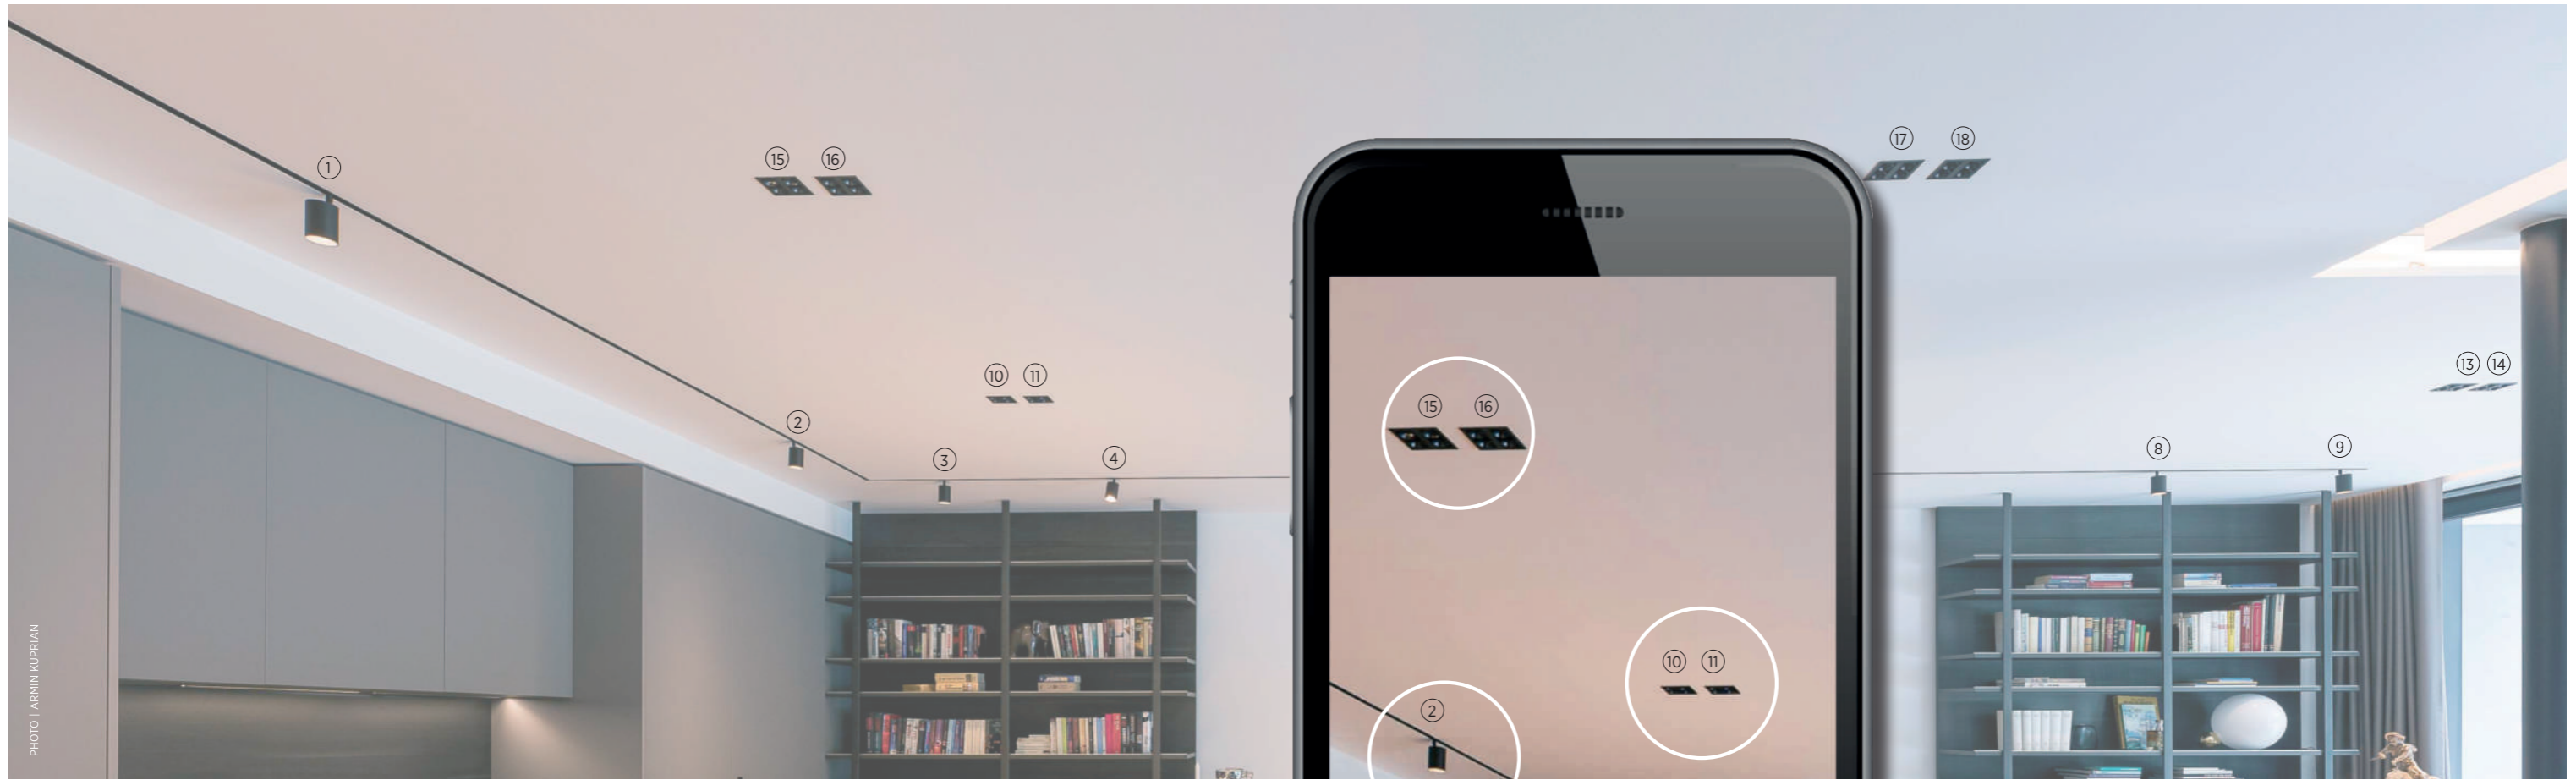

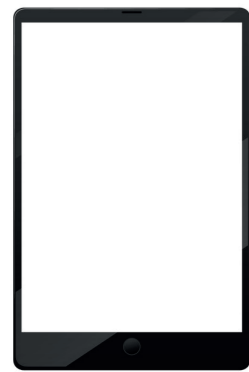

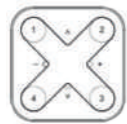

PHOTO | ARMIN KUPRIAN

MOBILE PHONE

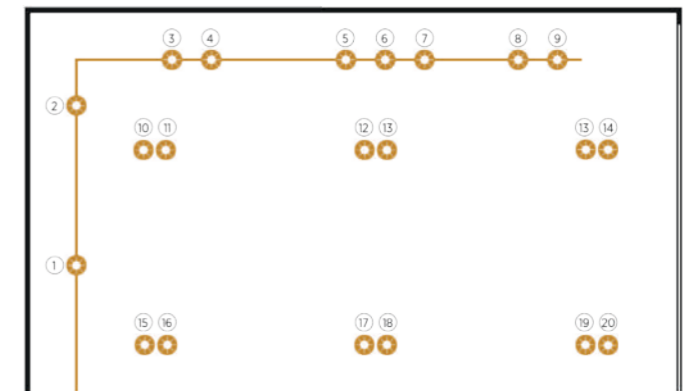

SMART SWITCH

STANDARD SWITCH

## CONNECTION EXAMPLE

## EXACTLY THE CONTROL YOU NEED

### PUSH DIM | 1 ADRESS

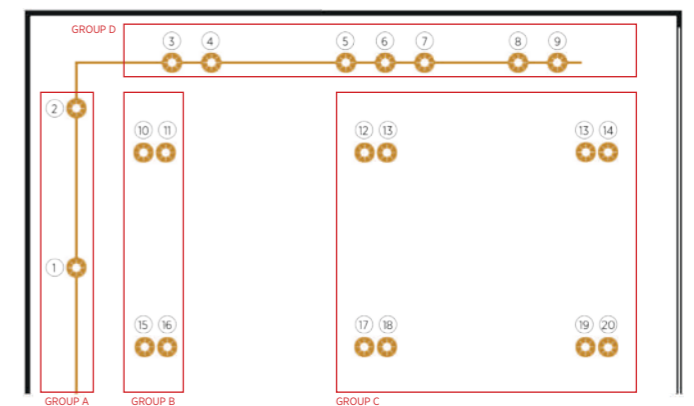

All of the inserts are dimmed in parallel and the last scene is stored.

### CASAMBI | 8 ADRESSES

Up to eight individual spots or groups and scenes can be controlled with CASAMBI.

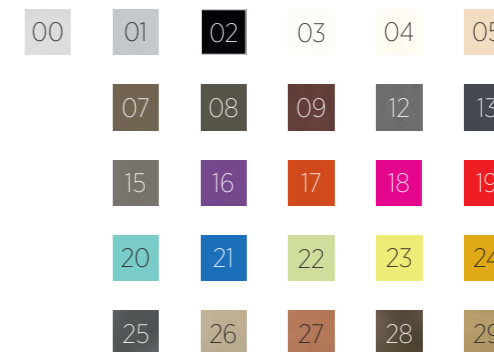

### DALI 2 | 64 ADRESSES

With DALI, 64 inserts can be individually programmed and saved scenes are available to be fetched from the storage. With this control, every room can be individually programmed or integrated into a holistic DALI solution for the whole object. In addition, a smaller housing of the control can be integrated into switch boxes to save space.
